🪪 Profile

Hello. I wanted to embody my interest in software development, which has started in the last years of my university life, and turn it into my profession. I have chosen frontend development as a new career path for myself. For this purpose, I am still working hard. Using the work ethic and discipline I've gained from my work experience for many years, I am trying to become an expert in this field by constantly improving myself. You can check my work on my GitHub page.

🎻 Interests

Basketball
I have been watching, playing, listening and following basketball for many years. Even though I can't watch the matches all the time, I somehow follow the leagues.

Formula 1
Especially in recent years, my interest in Formula 1, which I watched as a child, has flared up again. I try to follow it as closely as possible. Forza Ferrari!

Tennis
I've been watching and playing since I was a kid. This sport taught me to manage my ambition and patience.
